

# IAEA INTERNATIONAL TRANSPORT OF RADIOACTIVE MATERIALS

Course Duration: 16 hours | Retrain Frequency: 3 years

## PREREQUISITES

None

## AVAILABLE FORMATS

Classroom

## COURSE DESCRIPTION

This course is for those who prepare and ship class 7 radioactive material internationally. The International Atomic Energy Agency (IAEA) Specific Safety Requirements (SSR-6) and the additional requirements in 49 CFR are reinforced with practical application, industry events, shipping scenarios, and lively discussion. Fundamental shipper functions are also reviewed and interwoven throughout this workshop to ensure safe and compliant transport of class 7 radioactive materials. Training class materials will be provided to facilitate completing the course.

Successful participants receive a certification stating that the training meets the requirements of 49 CFR 172 Subpart H and IAEA SSR-6 Section 313.

## WHO SHOULD ATTEND?

Employees required to certify that shipments of class 7 radioactive materials are in compliance with DOT's 49 CFR Regulations and the IAEA SSR-6 for international transport.

## COURSE TOPICS

- IAEA & DOT Applicability
- General Provisions
- Training/Security
- Identification and Classification
- Proper Shipping Names
- Packaging Selection
- Marking, Labeling and Placarding
- Shipping Documentation
- Radiation/Contamination Limits
- Classroom Review Exercises
- Examination

## EASILY COMBINED WITH:

- IATA Air Transport of Radioactive Materials
- IMDG Water Transport of Radioactive Materials
